Summary

Junior Software Engineer with nearly two years of experience in backend and full-stack development using Java, Spring Boot, and cloud technologies. Proven ability to deliver scalable, maintainable solutions. Seeking to leverage my skills in building software solutions that solve real-world problems.

Professional Experience

Software Engineer (NYSC)

Global Accelerex, Lagos, Nigeria

August 2023 – July 2024

- Developed backend services using Java and Spring Boot for fintech applications.
- Integrated relational databases like MySQL and PostgreSQL to optimize system performance.
- Worked with Docker for containerization and streamlined deployment processes.
- Participated in Agile sprints, contributing to all phases of the software development lifecycle.

Backend Mentee

Wetech, Lagos, Nigeria

February 2023 – July 2023

- Assisted in developing backend microservices using Java and Spring Boot.
- Collaborated with senior developers on containerization and deployment strategies.
- Participated in the design and implementation of APIs and database integration.

Software Developer Intern

Africa Leadership X, Lagos, Nigeria

March 2022 – February 2023

- Built and deployed web applications using React and Java on AWS EC2.
- Followed Agile methodologies to ensure timely delivery of project milestones.

Projects

Hotel Reservation App

Technologies: Java, Spring Boot, React, PostgreSQL

Developed a hotel reservation management system that allows users to book and manage room reservations.
